

Feedback - The Structure and Dynamics of Knowledge Graphs, with Superficiality

1. General structure

While the paper is novel in her thought process, the structure of the paper suffers greatly. For example, there are confusion as to whether the paper is literature review or research paper. Also, the paper transition from areas that may appear as literature review to areas the present the paper contribution is confusing or missing.

Authors needs to structure the paper to the appropriate format to allow easy following.

2. Specific feedback

- a. Author fails to introduce concepts like preferential attachments and many more.
- b. Author references or bibliograph contains references that seems incomplete.
- c. References or Bibliography seems too long. Author should focus on reference that made it to text.
- d. Author seems to be calling knowledge base as knowledge graph these are two different concepts while they borrow information from each other.
